

Dominion® User Station Firmware Release Notes

Firmware Version: Dominion User Station 5.3

Release Status: General Availability (GA)

Date: June 29, 2026

Dominion User Station Overview

The Dominion KX III & IV User Stations are self-contained appliances that provide users with high-performance IP access to remote servers and workstations connected to the KX III & KX IV KVM-over-IP switches, with optional CommandCenter integration. Additional access methods supported: VMware virtual machines, limited web browser links and access via RDP, VNC & SSH. The User Stations have a powerful desktop user interface that is flexible and productive. Supporting multiple KVM-over-IP sessions over 1 to 4 monitors (DKX4-EUST), users can simultaneously access, view and control 8 or more servers.

The Dominion KX IV Enhanced User Station is a more powerful hardware version of the KX III Enhanced User Station. It provides users with high-performance IP access to remote servers and workstations connected to the KX III & KX IV KVM-over-IP switches, with optional CommandCenter integration. The KX IV Enhanced User Station is up to 3 times more powerful than the KX III User Station, supporting up to four connected monitors. It is recommended for customers using the DKX4-101, 4K video sessions, multiple KVM-over-IP sessions and four connected monitors.

Release 5.3 Firmware Overview

Dominion User Station Release 5.3 is a General Availability (GA) Release for applicable KX product groups. This release may include performance and productivity improvements, support for new products and accessories, new features and enhancements, bug fixes, and general fixes for specific model families. Specific updates are outlined below.

Important Notes

- To upgrade, the User Station must be running the Release 4.7 firmware.
- This Release is certified to work with Dominion KX IV – 101 switches or Dominion KX III switches.
- The User Station does *NOT* work with Dominion KX, KX II, LX, LX II, KSX II or other Raritan IP switches.
- The User Station integrates with Raritan’s CommandCenter Secure Gateway, recommend CC-SG firmware version 14.0.
- During the upgrade process, the screen may be blank for several minutes, this is expected behavior. Upgrade will complete in approximately 7 minutes (9 minutes from CC-SG) and KUST will boot to the login screen.
- Upgrading from CC-SG: After selecting to run the upgrade, CC-SG remotely logs into the KXUST to transfer the upgrade file. This takes approximately 1 minute, then CC-SG logs out. An error message is then displayed on CC-SG instead of a success message. This is expected. The KXUST remains at the login screen for another 1-2 minutes, then the upgrade starts. Total time for upgrade is approximately 9 minutes.
- OpenVPN connections are not migrated. Need to reconfigure OpenVPN after the upgrade.

Firmware Version	Upgrade Steps
4.7 or earlier	» 4.7 » 5.0 » 5.1 » 5.2 » 5.3

Please contact technical support with any questions or issues.

Applicability

This firmware release applies to the following Dominion KX models:

<i>Product Group</i>	<i>Applicable Brand: Model</i>
Dominion User Station Models	Raritan: DKX3-UST, DKX4-UST, DKX3-EUST, DKX4-EUST
Dominion KX Models	Raritan: DKX3G2-108, DKX3G2-116, DKX3G2-132, DKX3G2-216, DKX3G2-232, DKX3G2-416, DKX3G2-432, DKX3G2-464, DKX3G2-808, DKX3G2-816, DKX3G2-832, DKX3G2-864, DKX3G2-896, DKX3-108, DKX3-116, DKX3-132, DKX3-216, DKX3-232, DKX3-416, DKX3-432, DKX3-464, DKX3-808, DKX3-816, DKX3-832, DKX3-864, DKX4-101

General Guidelines for this Release

Please check the **Support & Compatibility** section below. Or contact Raritan Support if you are unsure of the model number of your unit it is typically viewable from the GUI's *Device Information* page and is also printed on a label located on the device.
